## TRAFFIC SAFETY CONES

Safety cones serve two main purposes, they direct traffic and they warn of obstructions. Safety cones on the road guide drivers to merge when a lane is closed ahead. They can also encourage drivers to move over because of a broken-down vehicle.

Safety cones are usually made of a durable plastic or rubber and are bright colours. Some cones have reflective tape around the top for greater visibility. Even though they're designed to be visible, some drivers don't see cones until it is too late. But the pliable nature means a vehicle won't be damaged if it hits a cone.

There are pros and cons of using safety cones. They can easily be moved and placed quickly, which makes them easier to use than other barriers. Any driver can keep a safety cone in their car to be used to warn others if their vehicle breaks down. However, they can also be easily run over or carried away. They aren't as durable and long-lasting as other, more substantial traffic barriers.

Safety cones also differ from signage because they don't convey information about the obstacles ahead. Drivers and pedestrians have to see why the cone was placed to understand how to respond to it. Safety cones have multiple roles in accident prevention and risk management. Your company might decide to invest in multiple types of cones to accommodate varying needs.

### SAND / METAL FILLING PROCESS

*Bottom with weighted pipe*

*Take out the bottom weighted tube*

*Unscrew the lid*

*Fill the tube with sand / Metal*

*Put the lid back on*

*Insert the weighted pipe into the return cone*

## HEAVY DUTY PLASTIC TRAFFIC CONES

- 1. Eco-friendly, High Relastic and Pressure Resistance
- 2. Beatiful Appearance with Stable Base
- 3. High Visible: High Quality Brilliant Reflective Film are Adopted
- 4. Portable, Easy To Storage and Transport

ITEM CODE	SIZE (cm)	COLOUR	WEIGHT(with sand)	MATERIAL
	66 x 30	Yellow Cone Red & White Reflective	2.5 Kg	Plastic
	59 x 26		2.0 Kg	Plastic
	66 x 30	Black Cone YellowGreen & Black Reflective	2.5 Kg	Plastic
	59 x 26		2.0 Kg	Plastic
	66 x 30	Blue Cone Red & White Reflective	2.5 Kg	Plastic
	59 x 26		2.0 Kg	Plastic
	66 x 30	Red Cone YellowGreen & Black Reflective	2.5 Kg	Plastic
	59 x 26		2.0 Kg	Plastic

## RUBBER & PLASTIC TRAFFIC CONES

PULL RING

ENLARGE & WIDE BASE

HONEYCOMB LATTICE REFLECTIVE

ANTI-COLLISION / PRESSURE RESISTANT / GOOD RESILIENCE

- 1. Easy to move & Access
- 2. 360° Day / Night Visibility Reflective Collar
- 3. Waterproof / Not Easily Deformed
- 4. High Strength & Durable

ITEM CODE	SIZE (cm)	COLOUR	WEIGHT	MATERIAL
	66 x 31	Black Cone White & Red Reflective	1.5 Kg	Rubber & Plastic
	70 x 35	Black Cone YellowGreen & Black Reflective	2 Kg	Rubber & Plastic

WhatsApp

## HEAVY DUTY PLASTIC TRAFFIC CONES WITH RING

- 1. Large Square Base
- 2. Sturdy, rigid design stays right where you place it
- 3. High-visibility Cones with Two Reflective Bands
- 4. 360° Day / Night Visibility Reflective Collar

ITEM CODE	SIZE (cm)	COLOUR	WEIGHT (with filling)	MATERIAL
	70 x 32	Black Cone White & Red Reflective	3.0 Kg	Plastic
		Black Cone YellowGreen & Black Reflective		Plastic

WhatsApp

## PLASTIC SIGN CONE WITH BOARD

Meticulous Work / Smooth layout

More stable engineering mechanical structure

Clear printing colour  
ABS or PP plastic material

Provides 360-degree visibility for increased safety

Chain Holder

Square Base

Locked Top

ITEM CODE	SIZE (cm)	COLOUR	DESCRIPTION	WEIGHT (with filling)	MATERIAL
	70 x 27	Yellow	CLEANING IN PROGRESS	1.0 Kg	Plastic
		Yellow	OUT OF SERVICE		Plastic
		Yellow	CAUTION WET FLOOR		Plastic
		Yellow	MEN AT WORK		Plastic
		Yellow	NO PARKING		Plastic
